

## THE CAPITAL OF HANSÁG: KAPUVÁR

### „THE MIRACLE OF KAPUVÁR”

*(said a journalist from Graz)*

At the Angiological Rehabilitative Department of Sándor Lumnitzer Hospital and Clinic of Kapuvár a therapeutic treatment of patients suffering from peripheral angiopathy (arteriosclerosis, vaso-constriction) is used, which might be considered as HUNGARICUM because it is unique not only in Hungary but in Europe.

### A MECCA FOR PATIENTS SUFFERING FROM ANGIOPATHY

The main indications of the carbonic acid gas bath:

**Chronic artery diseases of the limbs, chronic venous insufficiency, chronic lymphoedema, vasomotor disorders, rehabilitative treatment of sportspeople and enhancement of their physical performance, recreational treatment of managers, treatment of potency disorders**

Length of the treatment: three weeks

Daily complex treatment length: approx 2-2,5 hours

**Main purposes of the therapy: improving circulation, enhancing physical performance, slowing the progression, improving life quality.**
